DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 13-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Sako et al. (US 5,148,422) (hereafter Sako).

Sako discloses the claimed subject matter in claims 13-21 including plurality of “block” making up a frame and each of the “block” comprises sync signal (Fig. 5, element 70). Also, the first sync signal also discloses the claimed subject matter “frame sync data”. Further, modulation/demodulation, transmitting/receiving such signal in a communication system is inherent.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
